

MODEL PORTFOLIO

Ebony March

I am a model who specialises in editorial and commercial shoots.

I enjoy a focus on shape and emotion through posing, and love experimenting with lighting to bring life to photos.

01 about me

Modeling is an art form I deeply love. I used to think it was just about being in front of the camera, but it's also about you: your body, how you present yourself, whom you wear and whom you identify with.

Under different lights, lenses and creative direction, modeling gives me a chance to become a different person, one shutter click at a time.
